

Can Flashbay help you air freight your Power Banks?

The Problem

- According to the International Air Transport Association (IATA) Dangerous Goods Regulations, Power Banks with lithium-ion batteries are classified in Class 9 – miscellaneous dangerous goods.
- This means that all air transport of Power Banks must comply with IATA's regulations and United Nation's packaging, marking and labelling requirements in order for them to be exported safely and correctly.

The Solution

- As an industry-leading manufacturer and daily shipper of Promotional Power Banks, we have a special account approved by courier companies for the handling and shipment of lithium-ion batteries. Therefore, you can trust Flashbay to help you with the onward shipment of your Power Banks worldwide in a compliant and safe way. If you require our service, please follow below workflow carefully:

1. Keep the Original Boxes

that came with your Power Banks as they are necessary for further shipment

2. Contact your Sales Account Manager

to provide details on:

- Recipient Name
- Power Bank Model
- Quantity
- Destination Address
- Collection Address
- Collection Time Slot
- Delivery Deadline
- Reason for Onward Shipment

3. Receive & Accept Quote

4. Prepare for Collection

- Your Sales Account Manager will send you the exact procedure of how to prepare your boxes for collection – please follow it precisely
- We will then send a courier company to pick up your boxes

5. We will take care of the rest

- Handling of your boxes by our experienced and qualified warehouse staff for onward shipment
- You will receive a tracking number to see where your Power Banks are
- Delivery Successful!

Please contact your dedicated Sales Account Manager for a quote for Flashbay's Dangerous Goods Shipment Service
